Germany and therefore Europe up again after last weeks big move this is positive news.

This resulted in sows moving up 5p. Our market was a strong stand on. There was more interest in the fresh meat market than in previous weeks but with no increases in price. The European market will have influenced this and it is good to see that price difference between EU and UK shrink. Hopefully both prices can now go forward together. Pigs seem to be growing well with the SPP sample average weight 90.54kg that is five kilos heavier than four years ago when the SPP sample weight was 85.5 kg! The surprise is how much the pig herd has dropped in Ireland, 10%!
